Zusammenarbeit (GIZ) GmbH

Continuous increase in German ODA to Health 2002 - 2016

GER = third largest donor in health

Cooperation countries and regional programmes of German bilateral cooperation in health; 2019

BMZ's bilateral and multilateral engagement in health

- The new strategy **BMZ 2030** aims at making German development cooperation **more effective and strategic** and is strongly focused on **multilateralism**
- Commitment to **health systems strengthening and UHC**
- Support of efforts undertaken under the **Global Action Plan (GAP) for Healthy Lives and Well-being** need to establish a well coordinated global health architecture
- Strengthen **collaboration with WHO** to support its leadership and coordination role together with other key organisations
- Continuation of **bilateral health programmes** while strengthening **linkages to multilateral engagement**
- Strengthening **One Health** approach as a central element of pandemic preparedness

BMZ – Immediate bilateral and regional COVID-19 response

21 Mio. EUR Health funds reprogrammed

Total COVID-19 package	1,150	3,150

1 Precautionary measures to prepare for a worsened food situation in the second half of 2020

2 Final volume still to be determined

Discussion

What role for One Health approach going forward?

How to better link bi- and multilateral engagement?

What role for a network like P4H?
